

IMET 2000 PAL

International Medical Education Trust - Palestine

Issue 12, February 2017

The overall mission of the Palestinian Health Sciences Education Centre is to provide high level professional education services support and enhance the learning capacity of all involved in health science education and service delivery as a continuing lifelong learning experience. In doing so, it will undertake research and development to pioneer and exploit all modalities of the 1 revolution including video-conferencing, telemedicine, website learning and internet connections and vehicles such as Moodle aspiring to establish an international reputation as a center of excellence, eventually to have a major impact on patient care Palestine.

Emergency Nursing Core Training: Basic Electrocardiogram Interpretation (ECG) - Session III

IMET2000-Pal organised emergency nursing core training on Basic Electrocardiogram Interpretation (ECG). The workshop attended by more than 25 nurses working in different governmental hospitals, Augusta Victoria Hospital, Caritas Hospital, Istishari Arab Hospital and An-Najah National University Hospital. This workshop was led by Mr Osaid Rashid, a lecturer at Al-Quds University and a trainer adopted by American Heart Association.

IMET2000 Annual Dinner

IMET2000 held its Annual Dinner on February 3rd in the Peers Dining Room the House of Lords with Baroness Jenny Tonge our host. We had a wonderful evening with a mixture of fun and serious reporting to encourage the guests to give generously to our two programmes, one for physical trauma in children and the other for training health workers dealing with children and adolescents suffering extreme mental stress. The audience were first enchanted by the haunting music played on clarinet and nay by the Palestinian musician Mohamed Najem and then enjoyed a laugh with the stand-up comedian Imran Yusuf. They set the mood for the appeals in which two Palestinians, Ms Esra Hamdan and Dr Ahmed Almoghribi, who are supported by IMET2000 for their higher training talked briefly but movingly about their experience in physiotherapy for breast cancer, surgery for severe trauma, respectively. Our CEO, Dr Malik Zaben has then briefed the audience on IMET2000 strategy for 2017, which will incorporate supporting neurosurgical training in Palestine in addition to the physical trauma and mental health training programmes. The event was a great success not only financially but also socially thanks to generous guests, the public performers named above and to the meticulous organisation of our Events Manager, Ms Harriet Paul."
