IMET2000 Organised Trauma Evaluation and Management (TEAM) Training in Collaboration with Palestinian Medical Students' Association

IMET2000-Pal has supported the Palestinian Medical Students' Association (PMSA) through training grants for its participants in the Trauma Evaluation and Management (TEAM) programme, which focuses on injury assessment and management and is accredited by the American College of Surgeons. The training was held at the IMET2000- Pal Training Centre on Friday, 5/1/2024, and was attended by 16 medical students. It was conducted under the supervision of Advanced Trauma Life Support (ATLS) instructors. The session addressed incidents that demand rapid injury assessment and appropriate interventions to save patients' lives. The workshop employed comprehensive simulations based on real-life scenarios and followed the recommendations of the American College of Surgeons. As a result of the training, participants acquired the ability to promptly and accurately assess the conditions of injured patients. They also learned to determine the correct priorities for assessing and resuscitating patients. Furthermore, participants gained experience in collaborative care for injured patients during their transfer to the hospital.

IMET2000 Has Awarded Health Scientific Books to Birzeit University

IMET2000 in partnership with Book Aid International-London granted health scientific books in the field of nursing to Birzeit University. Dr. Omar Al-Mahmoud, Head of the College of Nursing, and Mr Imad Al-Asmar, Assistant Dean of the College of Pharmacy, Nursing, and Health Professions, attended IMET2000's office in Ramallah, where the two parties exchanged thoughts and experiences within the framework of future cooperation between the IMET2000 and the university.

In this project, we have distributed more than 442 books. Now those books are an integral part of universities of what's made the libraries a haven for conversation, debate and learning. We are happy to see students exploring those books and getting the knowledge they need to complete their education and build their future.

IMET2000 Organised Advanced Cardiovascular Life Support Training Workshop at IMET2000-Pal Training Centre

IMET2000-Pal held a workshop covering advanced cardiopulmonary resuscitation on 8,9/1/2024 attended by 6 doctors and nurses from different hospitals in cooperation with Arab American University (AAUP). It was titled:

Advanced Cardiac Life Support (ACLS) Course for Physicians and Nurses

The workshop aimed to educate participants on crucial aspects such as managing respiratory and cardiac arrest, symptomatic bradycardia, airway and stroke management, and relevant pharmacology. Additionally, it emphasized fostering effective communication and leadership skills within an ACLS team. The training, conducted by a certified instructor from the American Heart Association, involved the use of medical dolls for hands-on practice in advanced cardiac resuscitation techniques. The session concluded with an assessment to gauge the trainees' proficiency in handling emergency cases.

IMET2000 Organised Two Basic Life Support Training Workshops in this Month

IMET2000-Pal in cooperation with the An-Najah National University and the Modern University Collage Heart Centres organised TWO training workshops attended by 18 doctors and nurses from governmental and private hospitals on:

Critical Core Training: Basic Life Support (BLS) Training for Healthcare Professionals

The workshops took place at the IMET2000-Pal Training Centre and An-Najah Heart Training Centre. These trainings aimed to provide instructions and practical sessions about adult, children and infants Cardiopulmonary Resuscitation (CPR) for healthcare professionals and Automated External Defibrillation (AED). They were led by certified instructors from the American Heart Association (AHA).

IMET2000 Celebrates the Graduation of Its Grantees in MSc Oncology and Palliative Care Nursing

We're proud to share with you that Mr Ahmad Abu Afifa and Mr Mohammad Ishtawi, have completed their MSc studies in Oncology and Palliative Care at Bethlehem University, sponsored by IMET2000 and now they are working on the governmental hospitals.

The goal of these scholarships was to equip nurses with the skills to offer top-notch care to cancer patients, from early detection and monitoring to implementing rehabilitation and palliative care programs. This not only enhances the quality of care but also improves the life quality for both patients and their families.

Ahmad Abu Afifa
